If the existing value needs to be replaced, please use the Enrolment Revisions Submission.	Warning	If the incoming E593 (HDR end-user engagement code) is 00 or 01 and the HEIMS record contains 02, 03, 04, 05, 06 or any combination of 02, 03, 04, 05 and 06, then the HEIMS record is not updated with the incoming E593 value. Matching records are identified by E313 (Student Identification Code), E307 (Course Code) and E415 (Reporting Year/Period). There can be up to three records for each Student/Course combination. Multiple records for the one Student/Course enable up to three specialisations to be reported for the one Student/Course. For example, where 3 Specialisation records already exist for a Student/Course combination, then one must be deleted before another record is added for that Student/Course combination.
